# Homework 3

- Complete the practice introduced in this lecture note.
- What to submit:
  - A **zip file** that compresses the following files:
    - **Project source files** except libraries.
      - Clean your project before compression by selecting **Build → Clean Solution** in the main menu.
    - **Three screen capture images** that respectively show the different rotations of your triangles.
  - File name format
    - **hw3\_000000.zip**, where 000000 must be replaced by your own student ID.
- Due date: **2:30PM, March 29, 2021**
